Colds Should Not be Neglected

Within our bodies a constant warfare is being waged. The invaders are small, but mighty. The only hope we have of defeating them lies in our keeping our national guard and natural resources up to par. If this is done, we are practically sure of victory. If it is neglected, defeat confronts us.

At this time of the year our allied enemies are not waging so active a warfare. The question naturally arises: If this is true, why so many bitter conflicts and even numerous battles won for the enemy? The answer is simple: When man wars with man and the struggle has been long and fierce, if one army enters camp and apparently becomes inactive, how does this effect the other army? You say they may become careless and indifferent, and neglect their natural defences. That is true, and the same thing is true with us.

Winter retards the activity of bacteria—our enemies—to a marked degree. It is the ideal time for building up and strengthening our defences by way of preparation for the long, hot summer, when the heat will take the vigor out of our forces, and render our foes more active.

But instead of recuperating our forces, we allow them to go off guard and become scattered or congested. Either is apt to spell defeat. Our powers are weakened by inactivity. We do not get out in the open field, and drill, as it were, in hikes, outdoor games, camping out, and a dozen other activities which would put vim into our little army. On the other hand, we sleep in close, stuffy rooms, so to large gatherings where there is no proper ventilation, sit by a hot fire and read for hours. None of these conditions call for real action. When this is done, what happens? The phagocytes, which we may term our national guard, are, as it were, off guard. And it does not take a military man to tell that such an army is far from its best. What does a wise general attempt to do? He first tries to restore order, and gives his army room in which to fight. He does this by first determining the cause, and removing that if possible. His army is then placed in array so as to be ready for battle.

This placing the army in array can be done just as effectively in the body as in the army. A very good way of doing this is by putting the feet and legs in hot water. This draws the blood from the congested areas and into the big blood vessels of the lower limbs, thus giving our little army fighting room. Another very efficient method is by the hot and cold spray. This put the army into action at once. The hot water draws the blood to the surface, then a cold dash drives it back, thus sweeping out the waste and removing all impediments. It has been shown that after such a treatment the efficiency of the army has been raised about one third.

It is at this time of year that our militia is most likely to become congested, and now it is that our enemy is throwing out its skirmishing lines to harass and weaken our front. We do not recognize their deadly purpose, as would an old veteran of many battles. For, in almost every place we go, we find people hacking, coughing, sneezing, spitting, and complaining of being "all in" or "down with cold." Ask the trouble, and almost invariably receive the reply, "Oh, just a cold." Yet this insignificant cold is the forerunner, the skirmishing lines, of the strong and bitter enemy.

The two strongest confederates of this alliance are influenza and pneumonia. They lie in ambush till our lines have been weakened, then they rush in and try to take possession by storm, and the conflict usually lasts only a few days. Other members of the group attack such points as the tonsils, the bronchial tubes, the sinuses, and many other vital points. There is no end to the trouble they may cause.

This little enemy, "Just a Cold," is not so harmless as we might think. Aside from paving the way for more serious trouble, it is responsible for more than 25 per cent of all absences from school. It costs large corporations thousands of dollars each year, because it renders their employees sluggish, and unfit to perform their duties properly. It deprives the poor their daily bread, provides the patent medicine man with a limousine and plenty of ready cash, besides costing our government millions. Yet there is no excuse for its gaining such a foothold. This little enemy is easily conquered at first. It is a matter of personal hygiene, where an ounce of prevention is worth a pound of cure.

Sweet Clover Hay Good for Hogs

A simple ration supplemented with pasture and the provision of a sunshade usually results in a reasonable growth of young pigs in the summer, but under winter conditions it is more difficult to produce satisfactory gains.

The first essential to success in the wintering of fall pigs is to have the pigs born before September 15th, in order that they may be weaned and doing well before the severe weather comes.

A summary of results, in winter housing tests for growing pigs at Scott Station shows that a straw shelter is more satisfactory than a well constructed pigsty. In the tests, the inside lot usually appeared more thrifty during the early winter, but in several cases crippling occurred which was never the case in the outside lot.

The 1927-28 test was conducted from December 2 to April 17 and contrary to previous tests the greatest total gains were made by the lot in the pigsty, with no signs of crippling. The only important variation in feeding from that of other years was that both lots were given a small feed of sweet clover hay daily, which may have caused the variation in results.

Other findings are that either shorts or barley mixed with oats produced greater gains than oats alone. Skim-milk powder used at five per cent of the ration produced slightly greater gains than did tankage when fed at the same rate. The addition of cod-liver oil to the ration failed to increase the gains. Shorts and barley chop were practically equal in value when mixed with oat chop.

A winter ration for fall pigs which has given good results at Scott is one part barley chop or shorts to three parts of oat chop from the age of three months until the pigs average 100 pounds. One-third oat chop or shorts to two-thirds oat chop until the average weight is 150 lbs., after which equal parts of barley chop or shorts are used with oat until the pigs are ready for market. This ration is supplemented with five per cent tankage, five per cent oil cake meal, ten per cent bran and a small feed of sweet clover hay daily. The meal is fed dry during freezing weather. E. Van Nieu, Dominion Experimental Station, Scott, Sask.

NOTICE

IN THE ESTATE OF JOHN LATHROP ERICKSON, late of Irma, in the Province of Alberta, Farmer, Deceased.

NOTICE is hereby given that all persons having claims upon the estate of the above named John Lathrop Erickson who died on the 27th day of December, A. D. 1928, are required to file with Ronald D. White, Barrister, etc., 522 Tegler Building, Edmonton, Alberta, by the 27th day of March, A. D. 1929 a full statement duly verified of their claims and of any securities held by them, and that after that date the executor will distribute the assets of the deceased among the parties entitled thereto having regard only to the claims of which notice has been so filed or which have been brought to their knowledge.

Dated this 5th day of February, A.D. 1929.
RONALD D. WHITE, Solicitor for the executor, 522 Tegler Building, Edmonton, Alberta.

ALBERTA DAIRYMEN ON NATIONAL COUNCIL

Alberta dairymen interests will be represented during the coming year on the board of the National Dairy Council of Canada by the following men who were chosen at the recent convention of the council held in Vancouver: E. T. Love, Edmonton; J. W. Carlyle, Calgary; Norman E. Clark, Didsbury; W. W. Prevey, Edmonton, and J. R. Love, Edmonton.

It cannot gain an entrance to our body if we eat, ventilate our rooms, and exercise properly. If we see to it that we do not take "just a cold," we shall avoid a host of ills.

CHURCH NOTICES AND ACTIVITIES

UNITED CHURCH NEWS
Church School — 11 A. M.
Alma Mater — 3 P. M.
Irma — 7:30 P. M.
Subject: "Sixth Commandment" Being a Christian.

Sometimes children are the victims of what is called arrested development. For a time they grow like other children and then they stop. The years pass and they are no taller, no more developed. In the Christian life too, arrested development is abnormal. We should continually be pushing on, learning, developing, growing. There is a purpose in growth. A plant grows until it is able to accomplish the thing it was meant to do. A boy grows until he is fit to do a man's work. Christian growth is not for show but for service.

God intended us to worship Him in the church which He established, that we might "grow in grace and the Knowledge of our Lord and Savior Jesus Christ."

To this end, plan to attend at least one church service next Sunday.

BRITISH CAPITAL INTERESTED IN ALBERTA OIL WELLS

The announcement that a large group of British capital has been interested in a project for utilizing the surplus gas in the Turner Valley Oil and Gas field in Southern Alberta is conveyed in a telegram recently received by Premier Brownlee from Hon. Herbert Greenfield, representative of the Alberta Government in London. It is pointed out by the Premier that as a result of the activities of Mr. Greenfield's office, there has been in recent years a marked change in the attitude of British capitalists towards investments in Western Canada.

KINSELLA CITIZEN DEAD
Robert Breckenridge, resident northeast of Kinsella, died this morning, Wednesday, at ten o'clock. The funeral services will be held on Friday at two o'clock p.m.

PUBLIC NOTICE PUBLIC NOTICE IS HEREBY

given that there has been introduced in the Council of Municipal District of Battle River No. 423 a By-law of which the following is a short synopsis:

A By-Law of certain portions of the Municipal District of Battle River No. 423 for restraining animals at large:

In this by-law unless the context otherwise requires, the term animal means and includes horses, cattle, sheep, swine, goats, poultry and all other animals commonly known as domestic animals.

No animal the property of any person shall at any time be at large in those portions of the said Municipal District commonly known as Divisions, One, Three, and Six.

For all purposes of this by-law any animal shall be deemed to be at large which is off the premises of its owner and is not under the direct control of its owner or someone acting under his authority, or is not confined within any building or fenced field.

The Council of the said Municipal District may from time to time establish pounds at such places as to it may seem advisable and may appoint such poundkeepers as to it may seem advisable.

Any animal at large contrary to the provisions of this by-law may be impounded and dealt with in accordance with the Domestic Animals Act, being Chapter 25, Statutes of Alberta, 1923, and amendments thereto or substitution therefor. And that a copy of the same may be seen in each of the following places:

Battle River Bridge, Baybay Post Office, N. E. Corner of 12-45-7-wth, Irma Post Office, S. W. Corner 15-45-9-wth, Silver Lane School, top of Battle River grade Sec. 13-46-7-wth, Battle Heights School, and S. E. Corner 18-46-7-wth, and

FURTHER TAKE NOTICE that unless within thirty days from the publication of this notice at least (20) twenty resident electors of each division petition the Council to submit such by-law to the votes of the resident electors the Council will proceed to pass same.

NEWS ITEMS FROM KINSELLA

Mr. E. C. Williams spent a couple of days in Edmonton last week. Mr. P. J. Wangness returned on Saturday. He reports Mrs. Wangness as gaining very slowly. She is still in the Royal Alexandra Hospital and expects to be there for another week.

On Thursday evening, February 21 there will be a Congregational meeting in the United Church here, when the Secretary will give a report of the Church for the past year.

Mrs. MacDonald of Edmonton spent the week end with her daughter Miss MacDonald who is teaching at Badger.

Mr. and Mrs. Revell spent a few days in Edmonton last week. They returned Saturday.

Mr. William Anderson spent Saturday afternoon at Irma.

Mr. J. Barr spent the week end in Edmonton.

On Saturday last nominations for Councillors took place here.

Mr. P. E. Jones of Irma was in town on Tuesday evening. He motored up, but did not find the roads in very good shape.

Another cold snap has struck this place on Sunday morning, the thermometer registered 39 below zero.

W. C. T. U. THE CHILD

The nineteenth century has been called the woman's century. The twentieth century is the century of the child. As the past century has brought to the consciousness of the whole world a new recognition of the social, economic and national value of womanhood, so the present century is advancing in a new recognition of the child as the greatest asset of the Home, the Church and the State—and let us remember that the liquor traffic looks on the boys of today as their necessary patrons of tomorrow.

The following incident which occurred when the United States was not yet under prohibition illustrates the spirit of the traffic everywhere. An officer of the Liquor League of Ohio was speaking at a meeting in which the interests of the liquor business were being discussed. "The success of our business is dependent largely upon the Creation of appetite for drink. Men who drink liquor, like all others, will die, and if there is no new appetite created, our counters will be empty as will our coffers."

"The open field for the creation of this appetite is among the boys. After men have grown and their habits are formed they rarely ever change in this regard. It will be needful, therefore, that missionary work be done among the boys, and nickels expended in treats to the boys now, will return in dollars to your tills, after the appetite has been formed. Above all things, Create appetite."

WHAT THE U.F.A. DID AT THEIR CONVENTION

Re-elected H. W. Wood for fourteenth term.

Called for removal of present Grain Commission and reconstitution of Canada Grain Commission.

Urged Alberta Government to take "certain and determined action" to develop power resources under public ownership.

Endorsed the proposed new School Act by substantial majority.

Asked Dominion Government to provide free medical attention and hospital treatment to veterans of the Great War.

Recommended adoption by Provincial Government of Old Age Pensions legislation.

Declared in favor of international free trade and of general policy of tariff reduction in the interim.

Called for investigation by Federal and Provincial Governments into advisability of state life insurance.

Asked Executive and Co-operative Pools concerned to investigate possibility of establishing (a) a co-operative flour mill; (b) co-operative packing plant.

Endorsed plan for re-organization of Canadian Council of Agriculture.

Passed important resolution on Credit Reform.

Asked for immediate action to provide facilities for intermediate credits for agriculture.

Dealt with a total of 77 resolutions upon subjects of local, national and international importance.

The Wastebasket

A nice thing about a lot of your troubles is that they don't happen. When a traveling man, stopping at a hotel in Vegreville, came down from his room to the office stove to warm up one morning last week he found an old man sitting beside the stove with his face badly frozen and icicles hanging from his whiskers. Looking at the old man over sympathetically he exclaimed: "Good heavens, man! What room did you sleep in?"

An occasion to which it is not easy to rise in this cold weather—breakfast.

"What makes you think I am going to get a new car?" asked a citizen here when solicited by a local auto salesman. "Well," he replied, "I see your wife is learning to drive the old one."

"Why, when I was your age I didn't have as much money in a month as you spend in a day," said a local father in reprimanding his son. "Well, dad, don't scold me about it," the young fellow replied. "You should have made your complaint to grandfather."

Jennie: What's your worst sin?
Eileen: "My vanity; I spend hours before the mirror."
Jennie: "That's not your vanity; that's your imagination."

A minister at Camrose, noticing a new girl in the congregation he had not seen before, shook her hand and said: "I am glad to see you here. If you will give me your name and address I shall be glad to call on you." Hanging her head the girl replied, "Vell, you see, I have a feller already."

A travelling salesman stopped at a farmhouse where they raised a lot of apples and in buying some he asked the farmer what he did with such a big crop of apples. "Well, we eat what we can, and what we can't eat we can," replied the farmer. "We do the same thing in our business," replied the salesman. "We sell what we can sell, and what we can't sell we cancel."

A fond mother in a neighboring town, who has her own original ideas on educational subjects, sent the following letter to the principal of the schools: "Sir—It is neither my desire nor my wish that my son, J. J., persoo the study of grammar nor of any other dead languages. He can git along with plane English, and as he ain't ever likely to be a Physician he ain't no need to persoo the study of fizzlyology either, and I don't think their skiltons is a proper thing for children to study and I prefer that J. J. be confined to right-metick, readin', rogerly, and writin' as the names of the preminers of our country."

You should remember, says a sentimental observer, that no matter how short her skirts may be, she is somebody's mother.

A fortune teller visited Irma several weeks ago and a lady who consulted her was told "you will conquer all rivals and marry the man of your choice. He will be tall and dark and aristocratic looking." "And young?" interrupted the lady. "Now tell me one more thing. How shall I get rid of my present husband?"

Now is the time of the year to advertise for those stray horses and cattle. A small ad in this paper will help you.

Education and Leisure

It has long been the boast of Western Canada that its people are intensely interested in education. With pride the people have drawn attention to the fact that in towns and villages the most outstanding structures are the schools, while the vast expanse of prairie has been dotted with rural schools, the number of which in the three prairie provinces now approximates twenty thousand. These thousands of rural and village schools, larger public and high schools in the towns, still larger schools, collegiate institutes and colleges in the cities, and the three Provincial universities, are but the visible expression of the determination of the people of the West that the children of this and future generations shall not only thus be "prepared for life," but that they shall come to realize that education is life, inasmuch as it is both the accompaniment and the experience of life.

It is said that education is entering upon a new era. No doubt it is, because in this changing world we are always entering upon new eras, and education must do likewise. The basic aims, the great objectives of education abide. Methods change and the setting varies, but it remains true that health is fundamental, the tools and techniques of learning are necessary, citizenship is inseparable, service is a radiant star, home is man's great joy, leisure is liberty, and character is humanity's highest good.

Education is not confined to school and college. It does not even begin there, and certainly it does not end there. School is but a means to an end. Through it certain knowledge is imparted, but if that were all our schools would be a dismal failure. At best, schools in imparting knowledge give us tools to use, and, to some extent, train us how to use those tools and others which we will acquire as we journey through life. But education is not passing examinations from one grade to another or the attainment of degrees. Education is a training of the mind and equipment to enable us to meet all the joys and pleasures, the pains and sorrows, the duties and responsibilities, the vicissitudes of life, and put them all to the highest possible use.

An educated nation, it has been said, is one that has learned to surmount its interests to the point of a true and ethical culture, to penetrate its prejudices until it has come to truth, and to discover that every man has a contribution to make to the great society in the service of which he attains to freedom.

Five or six years ago, the National Council of Education held a great and noteworthy conference in Toronto, the theme of which was "Education and Life." In April next, it will convene another conference in Vancouver, with the general theme of its programme "Education and Leisure." The subjects for discussion by noted speakers and authorities from all parts of the world include: Literature, The Moving Picture, Music and the Dramatic, The Modern Organized Play, Recreation, Hobbies and Handicrafts, Health in Relation to Leisure.

Life is divided into hours of work, and hours of leisure. It has, however, become customary to consider education almost wholly in terms of work, and little thought has yet been given to education in its relation to leisure. The Lord Chief Justice of England, recently said that "accident only to think, the real cause of crime is the difficulty of finding healthy recreation and amusement for the young." The free hours of a large proportion of youths and adults are occupied with harmful and trifling pleasures. We must realize that it is when the young are idle that they form the habits which may later ruin their lives.

Modern machinery which is steadily displacing man in the production of man's material needs, is producing an ever increasing number of leisure hours. Education in the present and future must concern itself with the provision and enhancement of interests to occupy the leisure of both the child and the adult. There must be interests which education alone can give if men are to gain the faculty of using leisure easily, happily and fruitfully.

Such interests can be found in good literature, in music, in useful hobbies and handicrafts, in organized health-giving play and recreation. Organized games provide education in self-control. To "play the game" is instinctive to youth; developed to its fullest, this natural gift becomes an asset of great national worth and importance in the evolution of a high type of citizenship.

Labor unrelieved by recreation produces fatigue, and fatigue produces hate, lawlessness and despair. Recreation undirected, unregulated, fruitless, produces vice, degeneracy, and helplessness. Play is the natural expression of all the inborn instincts. When a man is natural and at his best, it is his spirit that plays.

Parents and teachers may well give greater heed to the trend of these modern days, and devote greater and closer attention to the encouragement of proper use of the leisure hours of the children under their care.

The First Ten Pounder

Englishman Now On Western Farm Intends To Purchase Land

Thomas Turnbull Fletcher, of Morpeth, England, described as the first ten-pounder to arrive in Canada found a place within twenty-four hours after reaching Winnipeg. Under the new scheme under which single British subjects of good physical condition may obtain passage for ten pounds, Mr. Fletcher qualified, and is now placed on a farm at Togo, Saskatchewan, under the direction of the C.P.R. Colonization Department. He is possessed of a little capital and intends to purchase land.

WHAT WILL IT DO?

Women are saying: "Pinkham's Compound keeps me fit to do my work." "I was nervous and all run down. Now I eat better and sleep better." "It helped my daughter, a year old daughter." "I took it before and after my baby was born." "I am gaining every day."

W. N. U. 1772

Boys Kill Timber Wolf

Animal Attacked Them In Woods Near North Bay

Marshall King and William Hall, two pupils of the Chapleau Indian school, are in proud possession of the carcass of a large timber wolf which attacked them when they were driving through the woods with a negligent of kindling wood.

Injured by injuries sustained in the jaws of a steel trap, the beast sprang at the boys.

The boys halted the horses and labored the wolf with slabs of wood. Unable to make their blows prove effective, they jumped to the ground and continued their fight. Finally a well-directed blow caught the animal on the head, killing it.

Tooth Welchs 300 Pounds

The largest tooth in the world, 11 feet 2 inches long and weighing more than 300 pounds, has just arrived at the Harvard Dental School Museum. It came from the jaw of a mastodon, and scientists estimate that it is more than 50,000 years old. Before the tusk was found in Alaska, the largest known specimen was the 8-foot one in the Carnegie Museum, Pittsburgh.

Minard's Liniment for the Gripe and Flu.

Using Radio To Send Fingerprints

Experiment Tried At Scotland Yard Is a Success

Experts at New Scotland Yard are carrying out experiments in the transmission by wireless of the photographs and fingerprints of criminals.

Remarkable success has already attended their efforts, and Viscount Eyang of Vimy, the commissioner, and various high officials who have seen the results, have expressed their approval of the venture.

This application by the police of the latest outcome of electrical research, will, in time, have effects of far-reaching importance in the prevention and detection of crime, and the thwarting and capture of criminals.

At present the description of a wanted man is sent either by post or telegraph, to various police forces and frequently the details are of a somewhat vague character; but, however informative a description may be, it obviously lacks the completeness of a reliable photograph, and it does not convey the vivid mental picture which is so helpful to every policeman.

One photograph with which an experiment was made, was that of a criminal named Brown, who murdered Police Constable Gutteridge and the transmission was so good that the wireless picture was easily identified. Fingerprints of famous criminals have also been transmitted with equal success.

It may be a long time before there is a chain of police wireless stations in England, but officials are certain that they can already transmit to stations in America and on the continent, and thus supply the authorities of various countries with the photographs and fingerprints of fugitive gangs of international thieves and others whose arrest is desired.

Radio Staff Puzzled

Discovered Beads Worn By Pianist Were Cause Of Vibrations

The mysterious vibrations in the KGO radio studio at San Francisco, which caused no end of trouble to the station staff has at last been found.

After an expert piano tuner tried for hours to remedy the trouble, all of the station's pianists were summoned to appear and Eva Garcia was found guilty.

Miss Garcia was "ordered" to leave her beads at home when she played at the studio. Sensitive microphones picked up a note in pitch with the beads and sent the vibrations over the air.

Freedom From Asthma. Asthma is one of the most distressing troubles, sudden in its attacks and prolonged in its agonies. Frequently many things are tried, but nothing seems to give hope of relief. Dr. J. D. Kellogg's Asthma Remedy is the one help which can be depended upon. If you have tried other remedies without success, do not fail to get at once a package of this uniformly successful preparation.

"Should an airplane be referred to as 'she'?" asks an inquiring subscriber. All except the mail planes.

There may be other corn removers, but you will not be completely satisfied until you have used Holloway's Corn Remover.

If we dig down into the earth to a depth of about 25,000 feet we find a temperature of 200 degrees.

"Marlatt's Treatment"

At this season of the year when intestinal "flu" is prevalent and in this age when so many are overburdened by blood pressure and "nerves," too much care cannot be taken to keep the system entirely free from poisons and impurities. Marlatt's has for many years been found most valuable in toning up the liver, in keeping the intestines functioning normally and in preventing bile stagnation. Try this highly recommended treatment now.

Five Dollars Recommended and sold by all leading druggists. J. W. MARLATT & Co. Ltd., Laboratories, Toronto. Write for unadvised treatment.

Need Continual Warning

Public Seem To Forget Menace of Level Crossing

While the ideal thing would be to eliminate every level crossing in the country—and steps toward that end are being taken—it will be many years before this menace to public safety is a thing of the past. In the meantime the public must be continually warned.

If every person would get it firmly fixed in his mind that each level crossing is dangerous and that each one must be so regarded when approaching it, the death toll from this source will be materially reduced. Motorists cannot afford to fool with level crossings.

RHEUMATIC PAINS DUE TO THIN BLOOD

Relief Comes Through the Use Of Dr. Williams' Pink Pills

The man who suffers from rheumatism, aches and pains in the swollen, aching joints is a little relief, and all the while the trouble is in the blood. That is why Dr. Williams' Pink Pills have proved so beneficial when taken for this trouble. They make new, rich blood which expels the poisonous acid and the rheumatism disappears.

There are thousands of former rheumatic sufferers in Canada, now well and strong, who thank Dr. Williams' Pink Pills that they are now free from the aches and pains of this dreaded trouble. One of these, Mrs. W. F. Tait, McKellar, Ont., who says:—"I am one of the willing ones to tell you of the great benefits I received from the use of Dr. Williams' Pink Pills. After lying in bed for seven weeks suffering almost agonizingly with inflammatory rheumatism, relief finally came through the use of this medicine. I could not move in bed, I could not get up, I could not sleep when I was given me. The medicine brought me relief. After taking six or eight boxes the rheumatism was banished with inflexible both capacity."

"Try Dr. Williams' Pink Pills for rheumatism, rheumatism, neuralgia, indigestion or nervousness. Take them as a tonic if you are not in the best physical condition and cultivate a regular habit of exercise. You can get these pills through any medicine dealer or by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont."

Western Canadians To Tour Maritimes

Principal Towns and Beauty Spots Will Be Visited

In an effort to bring closer together the East and the West, Dr. P. W. Fallis, publisher of the "New Outlook," the official periodical of the United Church in Canada, is organizing, with the co-operation of the Canadian National Railways, a tour of the Maritime provinces for the benefit of Western Canadians. The tour will leave Toronto by special Canadian National train on June 11, visiting Ottawa, Montreal, Quebec, going by steamer up the Saguenay River, thence by rail to the principal towns and beauty spots of New Brunswick, Nova Scotia, and Prince Edward Island. More than 80 persons from Winnipeg and the west are expected to take part in the tour, which will be personally conducted.

Extensions To Hotels

C.P.R. Increasing Accommodations At Calgary and Victoria

Extensions to the Palliser hotel at Calgary and the Empress hotel at Victoria, involving an expenditure of over \$4,000,000 by the Canadian Pacific Railway, have been decided upon. At the Palliser there will be an addition of four floors with 200 rooms and a large extension to the ballroom—which enlargements are expected to be completed by Stampede week. The Empress will have an entirely new wing with a 200-foot frontage to the water and a 220-foot frontage on Humboldt street. An addition of 270 rooms with baths will bring the total number to 550.

A venerable Scot purchased a radio set. A few days later his friends asked him how he liked this set. "Well, it's aw right to listen to, but those bulbs are nae guid to read by."

A married man says that he was always fond of tongue—and he likes it still.

THE GINGIVAE OR GUMS

Nature is a watchful Mother and so it is that she has clothed the teeth about with tissues that fit and wind about each tooth snugly like a protective garment.

These tissues, then, that so ably protect the delicate tooth membrane and supporting structures from exposure, and injury, are spoken of as the gingivae or gums.

Among the tissues of the mouth, the gingivae stand out in importance because of the fact that while in health they are barriers to disease, when injured they become the portals of entry to infective processes that are ever assailing the body defences.

For this reason the maintenance of the gingivae in health, is of utmost importance. These tissues have no direct attachment to the tooth at its neck, being simply fitted around closely, and they are so designed that food crushed between the teeth glides along their sloping surfaces to either side of the arch. Thus, all ledgments of debris which, in their decomposition, would give rise to offensive and disease producing compounds, are prevented.

Countless numbers of tiny fibres, embedded in the gingivae, pass to and fro in all directions and give them their firmness and elasticity. Where suffering through injury, or other cause, these fibres become weakened with consequent flabbiness of the gingivae exhibiting a lack of tissue tone.

The gingivae are particularly rich in blood supply as is evidenced by their color. By this means there is provided the rapid repair of tissues, following upon the frequent minor injuries and scraping that they are subjected to in the chewing of food. Firm and resistant as are the gingivae to minor injuries, yet where subjected to long-continued and repeated irritations, a mild inflammation is set up; progressing, leads to more serious disease that at once becomes a menace both to the teeth, and to the health of the individual.

Sweet and palatable, Mother Graves' Worm Extremator is acceptable to children; and it does its work surely and promptly.

Elephants are keen neither of sight, nor of hearing in comparison with other jungle inhabitants.

FOR NEURALGIA

BAYER

ASPIRIN

You doubtless depend on Aspirin to make short work of headaches, but remember that it's just as dependable an antidote for many other pains! Neuralgia? Many have found real relief in an Aspirin tablet. Or for toothache; an effective way to relieve it, and the one thing doctors are willing you should give a child—of any age. Whether to break up a cold, or relieve the serious pain from neuritis or deep-seated rheumatism, there's nothing quite like Aspirin. Just make certain it's genuine; it has the Bayer on the box and on every tablet. All druggists, with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer manufacture, to assure the public against imitations, the Tablets will be stamped with their "Bayer Cross" trademarks.

Wonders Of Suez Canal

Business Has Grown Enormously Since Waterway Was Opened

In 1870
Advices from Port Said express the opinion that the passing through of the huge Singapore Dry Dock in two sections is the greatest feat ever accomplished by that waterway, although usually ships pass through the canal in 15 hours. In 1870, the year after the canal was opened, the average time of passage was 48 hours and the largest ship accommodated was one of 4,414 tons. 75-day ships of 27,000 tons pass through the canal. Last year 5,545 ships with a total net tonnage of 28,962,018 passed through with transit receipts amounting to \$12,000,000. In 1870 the number of vessels was 486 with a tonnage of 436,600, while the receipts amounted to \$5,584,000.

Could Not Sleep Heart Would Start Pumping and Pounding

Mrs. Fred. P. Averill, 130-12th Ave., Calgary, Alta., writes:—"I was bothered so much with my heart I could not sleep. I would wake up in the night screaming, and my heart would start pumping and pounding. A neighbor lady told me to try

MILBURN'S HEART AND NERVE PILLS

so I started taking them and I can truthfully say I am a different woman. Altogether I only took two boxes." Price 50c a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Sparrows at Mayence, France, are artistic. Before building nests they wait for an annual rose carnival, then make their homes with confetti picked up from the streets.

The most important phase of aeronautics which is developing in Canada is the use of aircraft in mineral exploration and development.

Necessity Of Sowing Pure Seed If Grower Expects To Secure Highest Returns From His Farm

While admitting the importance of high fertility and good cultivation as essential for a good seed-bed, let us not forget the importance of sowing good sound seed, pure as to variety, free from weed seeds, of high vitality, and which has been treated for smut.

The time never was more opportune or more ripe for the necessity of sowing pure seed than it is today.

With the ever-increasing weed problem, and the multiplicity of varieties that are on the market, the time is at hand when we must sow pure seed, if we expect to get the highest returns from our farms.

The wide-awake farmer does not wait until the last minute to prepare and clean his seed, and will always be found ready when seedling time arrives, to sow seed that has been cleaned, of good germination, and which has been treated for smut.

The practice of the Morden Experimental Station, in regard to seed grain, is to clean all grain intended for seed purposes shortly after freeze-up and to forward two-pound samples to the Dominion Seed Branch, Winnipeg for grading and germination test.

With the long winter days, when the farmer has ample time to spare why not crank the little gas engine, start the fanning mill going, get the seed grain ready, and be prepared for the big rush in the spring.

For those farmers who are intending purchasing seed grain, now is the time to get busy. Don't delay, but secure your seed early; then you will have no worries about seed grain when spring opens up.

In a seed grain survey made in Manitoba, one farmer was sowing seed supposed to be Marquis, but up on analysis, only 60 per cent. was Marquis, while the other 40 per cent. consisted of weed seeds, and other varieties of grains.

We cannot hope to produce grain that will maintain our high standards on world markets if more attention is not given to the seed we sow. —Experimental Farm Note.

Canada's Northland

Department of Interior Is Exploring Northwest Territories

Much is being done by the Department of the Interior to organize and explore the vast territories lying to the north of the prairie provinces. It is fully realized that development of the natural resources will depend on a robust native population and an abundance of wild life. In conformity with this realization game reserves have been set aside for the sole use of the natives; expert investigators have been detailed to examine and report on wild life conditions; experiments have been conducted with a view of the introduction of new species of animal life; and regulations have been enforced with regard to the destruction of predatory animals.

Solved the Difficulty

My little niece's mother was trying to get the hated spinach down the child's protesting throat!

"In the middle of her attempts Shirley—who is three and also at the make-believe stage—said, 'Let's play, Mamma.'"

"Well, all right," answered mother. "What shall we play?"

"Let's play you're the little girl and I'm your mamma."

"Very well," agreed her mother. "Now you eat the spinach!" commanded Shirley.

Kid: "My father is a radio announcer."

Kid: "So is mine."

Kid: "Well, I bet my father is worse than your father."

"Are you a doctor?" she asked the young man at the soda fountain. "No, madame," he replied. "I'm a fizician."

"I want your legal help," Schulz knocked out on the street. "I will get you compensation."

"But you can't get compensation from a dead man,"—Lustige Blätter, Berlin.

W. N. U. 1772

Influence Of Sunlight

Experiments Show Pigs Eating Out-side Take Less Feed

In recent Iowa swine feeding tests one of the important observations made was the effect of sunlight on nutrition. Those pigs that were fed out in the open made about the same daily gain as the ones fed inside. But they did it on less feed, states a writer in Live Stock Markets.

The pigs fed inside required an average of 425 pounds of feed for each hundred pounds of gain to reach a weight of 225 pounds, while those fed in the sunlight reached the same weight with only 391 pounds of feed for each hundred pounds increased weight. The outside fed pigs made \$1.02 more per head over feed costs than did those fed inside.

John M. Evard, in charge of the experiments, thinks sunshine was responsible. He is convinced of this because the outside fed pigs did not do nearly so well during the early part of the feeding season when the days were short and cold. After the days became longer and more mild, there was a marked improvement in gains.

The conclusion is that probably in midwinter, it is well to feed pigs inside. They should, however, have alfalfa hay as a source of vitamin D to take the place of the sun's rays, and to aid in assimilating minerals. As soon as the days lengthen and the weather becomes more mild feeding outside will pay.

A charming little Parisian model smartly shirred across front, fashioned of English print with white pique collar and cuffs. Shirred of printed wool jersey, with plain self fabric contrast, navy blue wool crepe, tan linen with brown French blue satin with tiny white polka dots with white pique or pale blue chambray, are very striking and serviceable. Design No. 503 comes in sizes 2, 4, 6 and 8 years. The 4-year size requires 2 1/2 yards of 36-inch material with 2 yard of 36-inch contrasting. Pattern for full cut bloomers gathered to kneebands included. Price 25 cents in stamps or coin (coin preferred). Wrap coin carefully.

Key To Markets

The Canadian Agricultural Products Representative in Great Britain, W. A. Wilson, claims that the quality of Canadian bacon is satisfactory to the British trade. The key to the markets now, he says, is "production." Greater numbers of hogs and a steady increase every year are what the British buyers of Canadian bacon would appreciate most.

"Pop, how many legal holidays are there this year?"

"I dunno, son, better ask a bank clerk."

Best Peas For Canning

Experiments Show Alaska Variety Gives Highest Yield

The canning of peas has grown into an industry of considerable extent in many parts of Canada. In the province of Nova Scotia it has become an established industry. To find out the best varieties of peas to grow for this purpose a series of experiments was carried out at the Experimental Farm, Nappan. The important factors looked for as described in the report of the superintendent, published by the Department of Agriculture, Ottawa, in the varieties were uniformity of ripening, freedom from worms and disease, and the yield of crop. The variety Alaska gave the highest yield of 7,565 pounds of marketable seed to the acre. This variety produces a smooth round pea, with pods well filled that ripen fairly uniformly and has the appearance of excellence for canning purposes. Horsford Market Garden yielded at the rate of 5,445 pounds of marketable crop per acre. This variety did not ripen as uniformly as Alaska and is more susceptible to blight at the base of the stem. The Lincoln gave 6,516 pounds of crop to the acre of a very smooth round pea, but slow in developing. Advanced pea of medium size lacks uniformity in ripening and blights early. It yielded 5,435 pounds of marketable seed per acre.

Wealth And Wisdom

Getting of Gold Does Not Require Exceptional Ability

"And where shall wisdom be found?" Mr. Julius Rosenwald, founder of the great fortune, replies in a man of great fortune, replies in a "mousetone" that it is not in mere wealth. Most people, he says, believe that because a man has become wealthy, his views on any subject are valuable; but he holds that most large fortunes have been made by men of mediocre ability who "tumbled into a lucky opportunity." The friend of Job who came to comfort him said that wisdom could not be "gotten for gold." Mr. Rosenwald's 20th century corollary is that getting of gold does not imply special wisdom in the getter.

Canadians Saving Money

At the end of 1923, savings deposits in the chartered banks of Canada stood at \$1,359,662,201, which represents a per capita deposit for the Dominion of about \$140.

First Wife: "How long had you known your husband before you were married?"

Second Wife: "I didn't know him at all. I only thought I did."

FORMS FINANCIAL BUSINESS

C. Rice-Jones, who, until recently, was vice-president of United Grain Growers, has gone into the financial business in Western Canada, and has established his own company, C. Rice-Jones and Co., Limited. To devote himself to this business he has resigned from the Vice-Presidency and from the Board of United Grain Growers, thus severing a connection which has continued during many years.

Prior to 1917, he was President and General Manager of the Alberta Farmers' Co-operative Elevator Company. He helped to bring about the amalgamation of that Company with the Grain Growers Grain Company to form United Grain Growers Limited, and since 1917 has been first vice-president of the amalgamated company.

He has many friends in all the Western Provinces, and in addition is well known in financial centres. Mr. Rice-Jones has established connections with financial houses in Toronto, Montreal and New York, and is completing an organization of representatives in western towns and cities.

C. Rice-Jones and Co., Limited will be located in the Curry Block, Winnipeg, where a general investment service will be given on stocks and bonds, and, in addition, the company will participate in the underwriting of new issues of securities.

Fox Farming a Success

The Great West Silver Fox Farm, located about four miles from Princeton, B.C., made a shipment of 24 silver foxes to New Westminster the other day. There are now more than 100 foxes on the local farm which is meeting with pronounced success in the commercial breeding of foxes.

Practical Results Are Obtained From Research Work Done In The British National Museums

Make Good Hay Crops

Tests Made With Oats and Barley Were Successful

Oats and barley, when the varieties are carefully selected, make very good hay crops. At the Rothamsted Experimental Station five varieties of oats and one of barley were tested and the results of the test have been published in the report of the station for 1927 published by the Department of Agriculture at Ottawa. The varieties of oats tested were Banner, Victory, Gerlach, Gild, Rain and Liberty. Each variety was cut at the time of heading out, then two weeks later and again when turning. The crops cut at the turning period made a rich hay on account of the high percentage of kernel. The straw at this stage was also quite palatable. The crop cut at this stage also gave the highest yield of cured hay. Banner gave the best returns, though Victory, Gerlach and Gold Rain were also high. In the average of three cuttings, Gold Rain, Victory and Banner showed good returns and proved their suitability for annual hay purposes. In a three-year average of all cuttings Gerlach was the highest yielding, though the difference in its favor was only slight. Liberty, though a light yielder, produced the finest quality of hay. The barley used is known as feeder barley, an awnless variety, the straw of which remains green until the grain is nearly ripe. The yield from this was lower than from the oats but the hay from it is more palatable to live stock. In a three-year average the yield from the Gerlach, the highest, was two tons 504 pounds. The lowest yielding oats, Liberty gave almost 1 1/2 tons to the acre, while the hay from the feeder barley produced slightly over two tons from an acre of land.

The Natural History Museum, in South Kensington, the Science Museum in Exhibition Road, the Museum of Practical Geology in Jermyn Street, and the Royal Botanic Gardens at Kew, are four great scientific museums in the London area maintained solely or chiefly from public sources. Each has its visitors of the sightseeing kind. Each has its clientele of serious specialists, who visit the collections with a defined purpose and who know something of the continuous research that lies behind the public exhibitions.

Those museums, however, and their trained staffs have an immediate practical utility, on which much stress is laid in the Interim Report of the Royal Commission on National Museums and Galleries, because they are an invaluable and not sufficiently recognized agency in the development of industry and of industrial enterprise. A much larger part of the time of the staff that is generally understood is occupied not merely by curating and abstract research, but in studying and advising on problems of immediate practical moment.

Insects dispute man's lordship of the earth more seriously than any other living creatures by direct attacks on his food, his health, and his habitations. If an insect plague is to be fought, the exact species must be identified as a first step towards distinguishing between harmful and harmless and towards finding out the weakest point in the life history against which measures may be taken with most chance of success. Advice is sought from the staff at the Natural History Museum. The history against which measures may be taken with most chance of success. Advice is sought from the staff at the Natural History Museum. The history against which measures may be taken with most chance of success. Advice is sought from the staff at the Natural History Museum.

Western Canada's Grain Elevators

According to federal figures there are now approximately 4,700 country grain elevators in western Canada, with a total capacity of about 150,000,000 bushels, as against 4,337 in 1927, with a capacity of 147,000,000 bushels. The storage capacity of the terminal elevators at Port Arthur and Fort William, at the head of the Great Lakes, was increased during 1928 from 73,000,000 bushels to 80,000,000 bushels.

Collegiate Tours Enable Students to See 'Old World Attractions at Small Expense

DECK TENNIS DANCING ON DECK

The advent of Spring and early Summer will see thousands of care-free young men and women; college students, teachers, doctors, lawyers, artists, and other professional folk packing their suitcases, bidding adieu to their friends, and boarding ocean liners for a voyage to Europe. Not so long ago trips of this kind were confined to a few fortunate folk with a good deal of money at their disposal, but nowadays the Collegiate Tours, organized by the Art Crafts Guild of Chicago in conjunction with the Canadian Pacific Steamships, has enabled young people and others of limited means to travel and see the world. In former times a superficial knowledge of

one's own country was considered sufficient for the ordinary person but in these days of intense competition it is acknowledged that some idea of other countries, particularly those of the Old World, is desirable both from the standpoint of an employee and from that of the person who would deem himself or herself really well informed.

These collegiate tours which leave several times a month from Montreal and Quebec, offer steamship accommodations varying from the increasingly popular and economical tourist third cabin to the regular cabin class. They are conducted by experienced people and offer varying itineraries including England, Holland, Belgium, France, Germany,

Switzerland, Italy and other countries. "Tourist Third" must not be confused with regular third class, for it is a recent innovation in overseas travel and provides good, clean comfortable surroundings, an appetizing well-prepared menu, jovial and well-bred travelling companions and the run of a large part of a first-class liner at a very considerable reduction over the regular first cabin and cabin prices.

The St. Lawrence route to Europe is extremely picturesque and provides a river voyage of 1,000 miles before the open Atlantic is reached. Deck tennis, bridge parties, dancing on deck and other forms of entertainment speed the voyagers on their way.

A Sad Reminder

Mrs. Smith, just back from Europe, said to Mrs. Jones:

"I just couldn't bear looking at the ruins in Italy. They made me so homesick for my husband."

"Homesick for your husband?"

"Yes, you know, Henry has fallen arches."

Your work would not be so humorous if you put more humor into it.

"Is that number 99?"

"No, it is number 98, but we turned the number upside down for the sake of a change."—Sondag-nisse-Strix, Stockholm.

More than 20,000 acres of Indian lands, which include some of the best agricultural areas in the Peace River district, are likely to be sold at auction in the near future. This action will in all probability follow a survey that is being made in the north country by W. Morrison, Inspector of Indian Agencies for the three western provinces, with headquarters at Regina.

A new industry—badger farming—may be started in Saskatchewan by John Rothenberger, farmer, of Vancouver. Last spring Mr. Rothenberger caught a badger and four pups. He built a large pen, about 15 feet long and 4 feet wide. During summer he fed the badgers until they are now quite tame and are said to be larger than any badger running wild. Their coats are in excellent condition and offer of \$18 for each skin have been received.

A new world record was set by the Canadian Pacific Railway recently when a train of grain more than a mile in length was operated between Stoughton and Arcola, in Saskatchewan. It was the longest and heaviest grain train in history, consisting of 125 loaded grain cars, each approximately 40 feet in length, a water car, a caboose and engine. The gross weight was 8,722 tons and the total contents of the cars were 202,000 bushels of grain.

The enthusiasm of the citizens of Quebec is so infectious that it is an easy matter to interest visitors in winter sports, stated J. G. Strathdee, winter sports manager of the Chateau Frontenac, in giving a forecast of this winter's programme. Skating, skiing and tobogganing will be in full swing as usual; the dog derby will most certainly take place; and the ice car-nivals and stunts of the city will probably be featured again he said. Mr. Strathdee mentioned the splendid co-operation given the winter activities at the Chateau Frontenac by the Quebec Winter Sports Association.

The number of disciples of Isaac Walton, Canadian and American who have piled rod and reel in Canadian waters during the past season is greater than ever before, states A. O. Seymour, general tourist agent of the Canadian Pacific Railway at Montreal in announcing the winners of the Ontario herring camp fishing trophy competitions. Phillip Peterman of Laurium, Michigan, won the Nipissa River contest for speckled trout. Edmund Siechart of Chicago won the French River "musky" prize and Theodore Kipp of Winnipeg caught the largest bass entered in the Devil's Gap camp competition.

England will have enough Canadian apples shortly to keep its doctor away for the next year. There is any truth in the proverb as ships sailing for the old country this autumn are carrying more boxes of souvenir apples than by Canadians. Their friends across the sea. This has been the custom for the past few years and according to J. B. Martin, manager of the foreign department of the Canadian Pacific Express Company, it is becoming increasingly popular. So great has been the demand for Canadian apples in England for shipment to Europe that the British government has been obliged to have stands for the apples, shipping and exportation, granted by the export board.

Devotional Message.

(By Rev. J. W. Bainbridge, M.A.)

DEVOTIONAL MESSAGE FOR LOCAL HOME USE

Our text this week first comes to us as that strange question asked by Pilate of Jesus, viz. "What is Truth?" As a matter of fact that was the great question being asked by the leading thinkers of Pilate's and Jesus' day. When Jesus was being tried by Pilate He declares "My life and work are to reveal the Truth and to bring men to the Truth." Naturally, Pilate being an educated man, ren's "What is Truth?" or "What is Reality?"

This question embodies the quest of all ages. Humanity has ever been searching for some fact which they could say was final reality. Even with the coming of Jesus this search for Truth did not cease. Many did not accept Our Lord as the final authority; even the Disciples differed in their interpretation of Him, and the first three centuries of our era entertained many non-Christian cults and numerous Christian divisions. In 325 A. D. the Emperor Constantine tried to settle the question by establishing a Church, Bishops, Dogmas, and A Creed, and by investing them with final and absolute authority. Thus the Roman Catholic church enjoyed supreme authority for nearly 1300 years. Then through moral degeneracy in the Priesthood, gradually the Reformation took place, and in the seventeenth century, the Protestant Church claimed the Bible as supreme authority. From then on the bible was absolute authority in History, Science, Literature, and Religion.

Within the following century this absolute authority of the Bible was challenged. Students of the Universe began to ask questions relative to the Planets, Creation, Change, and Progress. The nineteenth century was a period of conflict between the Christian Church and Materialistic Science on the question of final reality or "What is Truth?" Fortunately, that conflict, in the higher courts of thought at least, has ceased, largely because materialists find themselves uncertain of their position, and, on the other hand, leading representatives of Religious Truth, no longer dogmatic, welcome contributions made by honest seekers after truth in all realms of life. Today, all worth while authorities recognise Truth and Reality as something which has not been fully comprehended in this life. Indeed, final Reality is God, and cannot be fully comprehended. Truth to us is relative. As we make progress our minds open to It or Him. We see this clearly illustrated in regard to Medical Science, Invention, Discovery, and Industry. What was final even one hundred years ago has largely been gloriously substituted today. Strange to say, however, people readily accept this fact in every other sphere except religion.

Unfortunately, people take it for granted that religion was finally completed 1900 years ago. The last revelation was made then; the last religious record was completed in the Bible; God has had nothing of a worth while nature to say to us since then. Now if we read The Book for ourselves, we find that it is a progressive record of God's Revelation; moreover, Jesus Himself says the manifestation of His Spirit following His physical life. "Will guide us into all Truth", and one of the last pictures in The Book is that of God on the earth saying "Behold I am making all things New."

It would seem then that Truth is that Living Rector of God, expressing Himself progressively in the Universe throughout all ages. Even today we are just on the fringe of the comprehension of Truth. None of us can afford to tuck our minds in and go to sleep content with Truth completed centuries ago. If we do, then we are shackles to the Progress of the Kingdom of God. Rather it is ours to be thankful for what the past has handed on to us, and, as true stewards of the present, to seek to co-operate with God, so that His Progressive Life and Truth may be unfolded to us and be the means of Redeeming others through us.

VIKING

A local lodge of the Order of the Sons of Norway was organized on Tuesday evening, Feb. 19th. The new lodge was named "Morgengry" No. 367.

The following officers were elected and installed:

President, John E. Kringen; vice-president, Lars Wollen; judge, Peter P. Nyhus; regent, Thos. M. Berg; secretary, Severin Torgerson; assistant-secretary, Anna G. Haagenen; finance-secretary, Sigurd Lefsrud; treasurer, Halvor P. Stokke; marshal, Ole Kjelland; assistant marshal, Burantia R. Benson; inside guardian, Rudolf Johannessen; outside guardian, Carl Thengs; warden, Cris Wollen; Elbert Solstad and Nilsine Wollen.

The installation of the lodge was carried out in the Elks' hall under the direction of Organizer H. E. Floen. Visiting members of the Edmonton lodge were, Elsie Stephenson and Bernice G. Floen.

After the installation the newly-elected officers took their places and conducted the closing ceremonies. Speeches were given by the new officers and all appreciated the opportunity of being members of the order. The next business meeting was set for March the 19th, and at which meeting the charter will be closed.

Present membership of the new lodge are: John E. Kringen, Lars Wollen, Peter P. Nyhus, Thos. M. Berg, Severin Torgerson, Anna G. Haagenen, Sigurd Lefsrud, Halvor P. Stokke, Ole Kjelland, Burantia R. Benson, Rudolf Johannessen, Carl Thengs, Cris Wollen, Elbert Solstad, Nilsine Wollen, Jennie Lefsrud, Marie Solstad, Engmar Benson, Ole B. Amundsen, Andrew Hammer, Haagen Haagenen, and Ole Thengs.

Mrs. Rollans and Miss Beattie entertained the members of the ladies' curling club last Monday evening at the home of Mrs. Rollans. Various contests and games were enjoyed during the evening. Mrs. McAthey winning the prizes. Some clever verses composed by Mrs. Rollans were read and created much laughter. Dainty refreshments were served.

The local bonspiel got under way to a real good start Monday evening and for the next two weeks everybody will be curling, and that's about all that anybody taking part in the game will be able to do, outside of taking a little nourishment between times, and say hello and goodbye to the other members of the family who are not taking part in thespiel.

There are four competitions, besides the Consolation, the Grand Challenge, Elk's Trophy, Merchants and King Edward.

Ladies and gentlemen of Viking and district.—The town of Viking is about to be treated to one of the fastest, most spectacular and interesting hockey games in its history, when the "Young Men" tangle with the "Old Soaks" on the Viking rink, Thursday evening, February 28th at 8 p.m. Let us tell you all about it and listen well for you can't afford to miss this classic in ice hockey.

First of all the rules governing amateur hockey for Alberta will prevail and Percy Main will no doubt dispense justice in his good old reliable way. Be it also noted that each athlete will be shod with steel blades. There is no catch in it anywhere. It is going to be a real hockey match and not a broom will be allowed on the ice unless perchance John Alexander wants to put on a squad to sweep in the intermissions.

The "Young Fry" led by Buzz Jones and Bob McAthey boast other stars of the hockey world including Ken Hilliker, versatile sorrel top, who is equally at home forward or aft, Jack and Lane McAthey, who are both good for sixty minutes Harry Lawes, Geo. Campbell, Jerry Brown, of High River, Harney, the unbeatable goalie and other hockey luminaries.

The grizzled warriors led by the Venerable, Dr. Richardson and Monte Hoskins can also boast a very formidable line-up including Val Marker, heavy fast skating and hard shooting forward, Cliff Hoskins, reliable goal tender, Bill Wagner and Bill Weise, both hard-working forwards, and for subs they may call upon any of the following, Dr. Saunders, Camille Dupre and Thunell. Now look over these galleries of stars and a prize will be given to anyone who can figure out a logical reason why this shouldn't be one of the fastest games of the season.

The game is sponsored by the Senior Hockey Executive who find it difficult now to get outside teams in but who want to give their supporters the opportunity to see good home games.

A perfectly good oyster supper is at stake as the prize for winning and since the losers must put up that prize you can dig down into your pants pockets, who wear them, and bet your last penny that competition will be just as strong as when Viking plays Holden for the Cup.

Miss Kay McGregor arrived from Jarroo on Saturday and is again with the Campbell & Co. staff.

Here and There

(228)
A skin game.—Two young boys living 90 miles northwest of Edmonton started a coyote farm in 1927 by digging young coyotes out of the ground and confining them in a pen. They got 140 young animals and when their skins were mature sold them for \$12 each.

A southern packing plant specializes upon horse meat for shipment to parts of Continental Europe where it is very popular. It has been suggested that the nondescript range horses straying about Southern Alberta be herded for packing purposes. It is a pity someone could not figure out a similar way of continuing some of the old motor cars that are loose on the highways.

Twenty old burners measuring overall 97 feet in length and weighing 72,000 pounds have been ordered by the Canadian Pacific Railway and will be in passenger and freight service through the mountains this summer. Each of them will do the work of two or more of the lighter locomotives. They are the largest in British Columbia and will revolutionize transportation in the west, it is predicted.

Victoria is having a mild winter golf tournament open to members of the local clubs and to guests of the Empress Hotel, and the players won't have to play in mittens and fur coats, either. In the east they have a game called winter golf that they play with bow and arrows on skies or snowshoes, but the golf at Victoria is the legitimate article. The game is played the year round in the equable climate of the Pacific coast.

Unique and luxurious cars, differing from anything operated in this country before, will be carried by the two crack trains of the Canadian Pacific Railway, the Trans-Canada Limited between Montreal, Toronto and Vancouver, and the Mountaineer, from Chicago to the Pacific coast, it has been announced. The cars will have sleeping rooms, valet service, lounge and smoking space, and a solarium, with vitra-glass windows.

The sea is constantly productive of tales of adventure. A recently told story is that about Commander S. Robinson, O.B.E., of the Canadian Pacific liner Empress of France who turned his ship into the face of a hurricane and went 500 miles out of his course to take aid to injured seamen on a storm tossed Japanese freighter. The great liner waited beside the freighter, which had been badly battered by the huge waves and some members of whose crew had been injured, but found it impossible for boats to pass between the two ships to convey a doctor. After waiting for half a day the master of the Japanese ship reported that he could make port, and the Empress of France continued on her interrupted voyage.

G. A. TRIPP,
Local Agent

Pioneer Implement and Real Estate Dealer

A prominent local farmer called last week to inquire the per hour or per day cost of a Company Mechanic to overhaul his tractor, which has broken fresh land and threshed for 10 years. I asked why not buy a new engine, 10 years should be long enough to run that one. His reply was, "Why it is good for another 10 or 15 years yet. This is one of the good two cylinder engines."

How many of the four cylinder engines will be running in 5 years? With their hundreds upon hundreds of flimsy wearing parts and scores upon scores of cogs, even beval gears.

The Cost of a John Deere Tractor is \$1284.85; 1-4 Cash, \$321.85 in fall, over 3 falls. 7 per cent. interest. — With Extension Rims and Spade Lugs.

The Cash Price of a 20-30 Rumely is \$1259.00. Terms if desired.

Advertising Stimulates Trade

Only choice leaves grown at high altitudes go into the blending of Blue Ribbon Tea. That is why its flavour is so uniformly excellent. Insist upon getting it from your grocer—refuse substitutes of inferior quality.

WORLD HAPPENINGS BRIEFLY TOLD

A report that Russia and Japan had severed diplomatic relations was officially denied in Moscow.

Thirty-two named or numbered varieties and strains of spring wheat were tested at the Central Farm at Ottawa in 1927.

Captain Isaac Coffin, believed to have been the last survivor of the Titanic, is dead, aged 93. He was born in St. John, N.E.

Production of automobiles in Canada during the calendar year 1924 reached a new record of 242,382 cars, having a sales value of \$151,826,338.

The U.S. House and Senate conferences on the deficiency appropriation failed to agree on the Senate amendment to provide \$24,000,000 for dry law enforcement.

James Melrose is dead at York, England, at the age of 100 years. He was refused a policy of an insurance company as a "bad risk" early in life. He was lord mayor of York, in 1866 and 1877.

Miller's Worm Powders will purge the stomach and intestines of worms so effectively and so easily and painlessly that the most delicate stomach will not feel any inconvenience from their action. They recommend themselves to mothers as a preparation that will restore strength and vigor to their children and protect them from the debilitating effects which result from the depredations of worms.

The only difference between the composition of the sugar on your table and the gasoline in your car is that the sugar contains a gas called oxygen which the gasoline does not.

What Will you do

When your Children Cry for It

There is hardly a household that hasn't heard of Castoria! At least five million homes are never without it. If there are children in your family, there's almost daily need of its comfort. And any night may find you very thankful there's a bottle in the house. Just a few drops, and that colic or constipation is relieved; or diarrhoea checked. A vegetable product; a baby remedy meant for young folks. Castoria is about the only thing you have ever heard doctors advise giving to infants. Stronger medicines are dangerous to a tiny baby, however harmless they may be to grown-ups. Good old Castoria! Remember the name, and remember to buy it. It may spare you a sleepless, anxious night. It is always ready, always safe to use in emergencies, for every ailment. Any hour of the day or night that Baby becomes fretful, or restless, Castoria was never more popular with mothers than it is today. Every druggist has it.

Fletcher's CASTORIA

W. N. U. 1772

Moved Large Tree

White Oak At Wellesley, Mass., Was Lowered Six Feet

An unusual feat of tree moving has been performed at Wellesley College, Wellesley. A large white oak observed the Christmas vacation by being lowered six feet. The cause of this descent was the necessary lowering of the hill on which the new dormitory, Stone Davis Hall, has been erected.

A large excavation was dug under the tree, which previously gave the appearance of being on a pedestal, and then powerful jets of water undermined the pedestal, and the tree dropped six feet to its new location.

Winnipeg Newspaper Union Fashion

354

Draped Slenderizing Silhouette

Distinctive smartness in charming new draped lines in one-piece dress that is partial to one-sidedness. The wrapped right front forms a drape in skirt. The jabot frill of bodice is decidedly flattering in its soft rippling movement attached to right front in rever styling. The unique belt, attached at either side of front, holds in gathers on right side. To make this attractive dress for the 36-inch size takes but 3 1/2 yards of 36-inch material. Style No. 354 is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust. It is sketched in sheer woolen in soft green tones. Black wool jersey, purple canton-faille crepe, black crepe satin-printed rayon velvet in mauve-brown tones, and black sheer velvet are new Paris ideas, utterly chic. Pattern price 25 cents in stamps or coin (coin preferred). Wrap coin carefully.

Sets Fractured Arm

By R-dio Instructions

Operator in Arctic Gets Medical Advice from Ottawa

Receiving medical instructions flashed 1,700 miles into the Arctic by wireless, and setting a fractured arm is the accomplishment of H. Hudson, radio operator at Hope's Advance, in the Hudson Strait. The story is told in a series of cryptic messages between Hudson, at the radio-landing station in the north and the short-wave station of the Department of Marine at Ottawa.

Preceding his first message by "Rush Medical," Hudson said that H. Hall, a fur trader, suffering from an elbow injury, had succeeded in reaching Hope's Advance from Dinu Bay by dog sled. First aid had been supplied, and he asked that a diagnosis and instructions for treatment be rushed back.

Within 50 minutes F. Woodrow of the Trail Radio Station had obtained the required help from Dr. J. J. Hagar of the Department of Health. In the lonely station in the north the operator succeeded in obtaining a diagnosis and setting the arm in splints. His latest message indicated that his patient was progressing satisfactorily.

Does Not Always

Require Intelligence

Astonishing Feats in Mathematics Accomplished by Ignorant Persons

The gift of computation does not according to scientists, of necessity indicate a high order of intelligence. A famous example, writes "Empire," is that of Tom Fuller, a Negro slave born in Virginia, who though he could neither read nor write, astonished 15th century investigators by his feats in mental arithmetic. Jacques Francaise again who could multiply four figures by four figures in his head as rapidly as a skilled operator could perform the feat with a machine, was merely an imperfectly educated peasant from Picardy. He could also give the product of still larger numbers, but the advantage then lay with the machine. Some eminent mathematicians have of course, also shown, as computers, and Euler must have had marvellous powers of what Biddle called "registration," since he was able to pursue his mathematical researches after the loss of his sight.

To Prevent "Flu"

INFLUENZA GERMS FIRST ATTACK THE NOSE AND THROAT

Dangerous germs which lodge in the breathing give you Grippes, Flu, or Influenza. You can destroy these germs if you cleanse your nose, mouth and throat with Catarrhazone. When the healing vapor of Catarrhazone is inhaled it releases powerful antiseptics which destroy every vestige of germ life.

Protect yourself against "Flu" by using Catarrhazone; it stops a cold in a few moments, cleans the nostrils, takes soreness out of the throat. All the irritating matter in the nose and throat that smells so bad, that gives you a headache, and makes you cough. Catarrhazone cleans it all away.

For Influenza, Catarrh, Nose Colds, Irritated Throat, you will get prompt and effective action from Catarrhazone. Carry the Inhaler in your purse or pocket, use it frequently. Complete outfit \$1.00. Smaller size 50c. at all dealers.

Four million miles of flying were recently completed by the cross-channel fleet of the Imperial Airways. Since 1924, the company's planes carried more than 97,000 passengers and 3,000 tons of freight between London and the continent of Europe.

ECZEMA IN RASH ON HANDS

Troubled For Three Years. Healed by Cuticura.

"I was troubled with eczema on my hands for three years. It appeared in a rash and then formed blisters. It troubled me much worse in winter. I could not put my hands in water or be near heat. My hands were terribly inflamed and disfigured. I had to wear old gloves to keep from scratching."

"I saw a Cuticura Soap and Ointment advertisement and sent for a free sample. I got relief from it so I bought more and after I had used them for three months I was healed." (Signed) Miss Beatrice Aiken, Highwater, Que.

Use Cuticura Soap, Ointment and Talcum for daily toilet purposes.

Solely Sold Free by Dr. J. C. Allen, 1000-1001, 1002-1003, 1004-1005, 1006-1007, 1008-1009, 1010-1011, 1012-1013, 1014-1015, 1016-1017, 1018-1019, 1020-1021, 1022-1023, 1024-1025, 1026-1027, 1028-1029, 1030-1031, 1032-1033, Reduce the Acid

Sick stomachs, sour stomachs and indigestion usually mean excess acid. The stomach nerves are over-stimulated. Too much acid makes the stomach and intestines sour. Alkali kills acid instantly. The best form is Phillips' Milk of Magnesia, because one harmless, tasteless dose neutralizes many times its volume in acid. Since its invention, 50 years ago, it has remained the standard with physicians everywhere.

Take a spoonful in water and your unhappy condition will probably end in five minutes. Then you will always know what to do. Crude and harmful methods will never appeal to you. Go prove this for your own sake. It may save a great many disagreeable hours. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in corrective excess acids. Each bottle contains full directions—any druggist.

coarse lips was one that would cause any decent man to see red. Donald stiffened. His face turned livid. "You dirty cur!" he flamed. "Don't you know that there is a lady present? You apologize to this little girl or I will whip you within an inch of your life!" His voice trembled with passion. "Lady," scoffed Hand, "and you call a lady? She must be nice lady, runnin' in de woods wit' you ev'ry Sunday."

A murderous look shot from Donald's dark eyes. A terrible rage possessed him, a rage that made his blood feel hot in his veins and gave him the unnatural strength of a madman. A dull red flamed in Connie's tanned cheeks. She sat down and covered her hot face with her hands.

Andy now came running from the kitchen, dressed in white cap and apron, his right trailing at his side. "What's goin' on, Donnie?" he questioned.

Donald did not answer. Gills spoke to Andy in an undertone. "My God, Donnie, 'e's twice your size! Don't fight 'im!" implored Andy.

"I'll hit him!" rasped Donald. Gills seized his arm. "Let me fix the d— skunk; he's nearer my size."

"No, this is my affair!" shaking himself from the grasp. The sound of a paddle came from below, and the trapper sprang from his den and came swiftly up the hill. As Andy briefly explained the situation the old man's grey eyes narrowed to mere slits beneath the shaggy brows.

"Ah!" he breathed. "Life and 'Betsy," patting his six-shooter, "we likes to shoot up bunnies. We shoots them in the heel so's to save their clothes." His mouth was set in a grin and, a smile that was belied by the steady look in his deeper eyes. He seated himself on a log and placed his gun on his knees.

Donald had by this divested himself of coat and shirt and now stepped forward dressed in light cotton trousers, a sleeveless undershirt and moccasins. "Hand," he said in a steady voice, "this is between you and me. See to it that your men do not interfere; I will work for mine."

The big foreigner was rubbing his big hands as though in pleased anticipation. "I suppose you know how we is goin' to fight? Everything goes, you know." His grin was fiendish.

Donald knew what was meant. There were to be no rules of combat; no time duration; no referees; no rounds, and were to the man who should go down. It was to be a battle as of primeval man. It might result in terrible injury and mutilation. He sickened at the thought.

Help Would Be Welcome

Prosperity Enjoyed in Canada Should Make People Generous

The British government, staggering under a burden of taxation never before borne by any other nation in modern history, has done all that was humanly possible in the way of providing state safeguards against the conditions which now prevail. Yet stark poverty stalks through the land, and semi-starvation and exposure have combined to make an attack on a people which a disease epidemic would change into a tragedy that would stir the entire English-speaking world. Circumstances beyond the control of the stricken people are responsible for their adversity; circumstances largely beyond our own control have made Canada so prosperous as to be able to extend a helping hand—at once.—Toronto Globe.

How He Understood It

One day, in the third grade reading class, the teacher was telling a story of a dog and a fox. When she came near the end of the story she said, "And the cunning fox jumped up on the stone wall and ran along it, and the dog lost his scent."

When she finished the story she called on the little Italian boy in the class to repeat the story. Joe stared all right, but as he came to the end of the story he said, "An' de cunning fox, he jump up on de stone wall an' run along it, an' de dog, he lose his penny!"

Largest in World

The Canadian Government Experimental Farm system now embraces twenty-seven farms, seven substations, one horse-breeding station, one fox ranch, ten plant pathological laboratories, and 203 illustration stations at different points in the nine Provinces of the Dominion. The system is the largest of its kind in the world.

Recipes For This Week

(By Betty Barclay)

GRAPE MOULD

- 5 tablespoons quick-cooking tapioca.
- 1/2 teaspoon salt.
- 1 pint hot grape juice.
- 1/2 cup sugar.
- 1 cup shredded pineapple.
- 1 cup quartered marshmallows (if desired).
- 2 egg whites.
- Lady fingers or strips of sponge cake.

Cook tapioca and salt in the hot grape juice in a double boiler 15 minutes, stirring frequently. Stir in sugar. Remove from fire and add pineapple. When partially cooked, stir in the marshmallows (if desired), and fold in the stiffly beaten egg whites. Arrange split lady fingers around sides of a glass bowl or around individual sherbet glasses. Pour in mixture and chill. Serve with whipped cream. Lady fingers or sponge cake may be omitted.

MACARONI WITH OYSTERS OR FISH

- 6 ounces macaroni.
- 1/2 teaspoonful salt.
- 1-6 teaspoonful pepper.
- 2 tablespoons butter or a substitute.
- 1 pint oysters.

Cook the macaroni until tender in boiling salted water, drain, then season with the salt, pepper and butter. Oil a baking dish and put a layer of the macaroni into it, then a layer of oysters which have been carefully picked over, more macaroni, more oysters, and so on until the dish is full. Pour the liquor from the oysters over the top—there should be a cupful of this liquor—if there is not enough make up the deficiency with milk. Bake twenty minutes in a moderate oven—350 degrees F.—and serve with tomato catsup.

Cold left-over fish may be substituted for the oysters if desired, using left-over sauce or milk for the moistening in place of the oyster liquor.

The Carnival Of Noise

Much of It Is Unnecessary and Could Be Eliminated

The present high peak of street noises has been reached so gradually that many persons have not fully appreciated what they are allowing others to inflict upon them and have not stopped to consider whether, in fact, the various components that make up the existing pandemonium are really necessary and unavoidable. Each new addition has been accepted with astonishing complacency. The unrelenting motorcycle, the klaxon, the heavy lorry, the airplane, the steam tractor and the pneumatic drill, have been tolerated in turn. Each of these noisy inventions has been turned loose without let or hindrance and people have ceased to marvel at them or to wonder what diabolical invention engineering science will thrust upon them next.

Sore Corns Drop Off If You USE "Putnam's"

When you notice any sign of callosities on the feet or toes—that's the time to point on a few drops of PUTNAM'S CORN EXTRACTOR. Do this, and you prevent corns. No matter if the corn is hard or soft. Let it be on top or between the toes. Putnam's will remove it without pain. Insist on PUTNAM'S CORN EXTRACTOR. It does the work—and roots out the corn, quickly and without pain.

A Clever Idea

The *Durham Chronicle* tells of a young man who visited a store in that town, purchased three dozen eggs on credit, took them to another store and sold them and used the money to buy gas for his car. This is probably the first instance of a thirty-six hen-power automobile.

Use Minard's Liniment For The Flu.

May Be The Reason

Women's feet are now two sizes larger than they were twenty years ago, according to an orthopedic expert. Is this because she has been trying to fill man's shoes.

Little Helps For This Week

"Give us this day our daily bread." Matthew vi. 11.

Master, help! From hour to hour. Lord, I need Thy saving power. Not to soothe tomorrow's woes. Not to bless tonight's repose. Now I hunger to be fed. Give today Thy daily bread. Every moment hold my hand; Without Thee I cannot stand. Show my foot the place to tread; Step by step I must be led. Go before me all the way; Give me daily bread today!

—Rose Terry Cooke

What is this bread, O my God? It is not merely the support which Thy providence supplies for the necessities of life; it is also the nourishment of truth which Thou givest each day to the soul. It is the bread of eternal life, giving it vigor, and making it grow in faith. Thou dost respond to every day. Thou givest within and without precisely what the soul needs for its advancement in a life of faith and redemption. For whatever happens to me each day I'm daily bread, provided I do not refuse to take it from Thy hand and feed upon it.

A steadily increasing group of words making its way into the dictionary is that of dialectal, provincial and local words and expressions.

An official report states that five hundred kinds of material are used for men's shoes.

Don't Neglect Bronchial Colds

Pneumonia, "flu" and other dangerous diseases develop from common colds. To prevent trouble take BUCKLEY'S Mixture. It quickly relieves the cough and removes the cause. Different from other cold remedies. It's a scientific combination of proven virtues. Sold by all druggists and dealers.

W. K. Buckley, Limited, 112 Mutual St., Toronto 2, Ont.

BUCKLEY'S Mixture. A single slip proves it. 75c. and 40c.

WINDOLITE The Improved Glass Substitute

MADE IN ENGLAND

COMES WITH A MESSAGE OF HEALTH

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandas, school's, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold, will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 lbs., while a square yard of glass of ordinary thickness, weighs about 135 to 150 lbs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, F.o.b., Toronto.

Use WINDOLITE and let YOUR PLANTS YOUR CHICKENS YOUR CATTLE Bask in 100% Sunlight Send for booklet "WINDOLITE"

Distributors: JOHN A. CHANTLER & CO., LTD. 51 Wellington St. W. TORONTO, ONT.

FLU Germs Breed In the Throat.

First Appear As A Common Cold, But Gain Tremendous Headway In Six Hours

SOME SIMPLE PRECAUTIONS AGAINST INFLUENZA

Simple precautions taken now will enable you to fight dreaded "Flu" which is sweeping rapidly through the whole country. The germs of Influenza gain access to the body through the mouth and throat. Keep the throat healthy and you go a long way towards stopping the trouble. An effective means of prevention is to gargle the throat three or four times daily with Nerville. Half a teaspoonful of Nerville in water makes a most efficient gargle. The germ-killing properties of Nerville quickly destroy any bacteria in the mouth or throat. If the chest aches, if the throat is hoarse, if you have a cough—be sure to rub the neck and chest with Nerville. Every drop of it will rub in, and out will come the congestion.

Of course it is absolutely necessary to house-clean the system with Dr. Hamilton's Pills which stimulate the eliminating organs, and rid the system of disease-breeding germs. This combination treatment of Nerville and Dr. Hamilton's Pills will give prompt and entirely satisfactory results.

Here and There

(233)

Large cargoes of wheat are being shipped to Japan and the Orient through Vancouver these days. It seems like sending coals to Newcastle to send flour to "the Flowery Kingdom."

Some foundation for the old nickname "woolly" west is found in the report that Alberta's wool output for 1928 amounted to 3,033,181 pounds. Altogether the Dominion produced over eighteen and a half million pounds.

Steel is replacing wood in freight service on the Canadian Pacific Railway as 7,500 box cars now on order for the company will be of steel construction. They will have a capacity of about 2,000 bushels of grain and a load of 120,000 pounds.

Fur-farming is developing many branches, one of the most recent being the organization in Manitoba of the Manitoba Muskrat Breeders Association. The body plans to study muskrat breeding conditions and to investigate all phases of the industry.

In a recent speech at Kitchener, Ontario, E. W. Beatty, chairman and president of the Canadian Pacific Railway, said that the average freight rate per ton per mile in Canada is about 5/4 per cent lower than in the U.S., and that the average Canadian grain rates is 40 per cent lower.

The Trans-Canada will cross the continent in an hour and a half less time eastbound, and an hour less westbound than it did last year. This does not mean that Canada has got any smaller, but that the Canadian Pacific Railway is running the famous flyer on an improved schedule.

Penny postage, inaugurated at Christmas, is working well, and bringing about a notable increase in letter mails from Canada to the British Isles, according to federal postal officials. It is estimated that the increase in the course of a year would be such as to offset the \$200,000 estimated reduction in revenue by the penny rate.

In Manitoba, there is one tractor for every 4.6 farms; in Saskatchewan, one for every 4.7 farms; and in Alberta, one for every 7.5 farms. If all the tractors were hitched together, how long could it take a garage mechanic to reach the moon.

For the sixth successive year Iwan Sinclair Laird of Macdonald College, Ste. Anne de Bellevue, Quebec, will conduct an all expense tour across Canada, and back starting from Toronto on July 22, and lasting for 21 days. The party travels in a special train with a baggage car filled up as a sixty-foot dressing-room.

Equipped with a bow-rudder, a new device that will aid in navigating the harbours of Victoria and Vancouver and the waters of the British Columbia coast, the Princess Norah has arrived on the Pacific seaboard to join the fleet of the B. C. Coastal Lines of the Canadian Pacific Railway. She is the eighteenth ship to be built for this work and has been constructed at the shipbuilding yards on the Clyde in Scotland.

Forty-two years of service with the Canadian Pacific Railway without having broken any of the company's rules or otherwise earned a mark against himself is the unique record held by Arthur W. W. Reardon, engineer, who has just retired on pension. Mr. Savage, who is well known throughout the Eastern Townships, fired the train that laid the first steel on the line between Sherbrooke and Farnham.

The old English Yuletide Festival held recently at the Empress Hotel in Victoria, B.C., proved to be one of the most popular events of last year. Carols and yuletide music were rendered, the ancient "Chester Mystery" staged, and the "Mrs. Wardle's Christmas Party" was produced. The festival culminated in a ball at which some seven hundred persons attended. It is believed that plans are already being made for a larger and better celebration next year.

A change in telephone numbers has drawn attention to the train inquiry office in the great Windsor Street Station of the Canadian Pacific Railway in Montreal. The girls who are on duty there handle each on an average of 200 calls an hour, and as many as 300 an hour during rush times. They carry most of the information in their heads and seldom have to refer to a time-table. They are asked queer questions sometimes. Recently someone asked, "When does the afternoon begin," and the old poser turned up, "What time does the four o'clock train leave."

Dr. Knechtel, a farmer residing about four miles east of Souris, Manitoba, has about 6,000 bushels of Reward wheat which he is going to ship out all over Western Canada in two bushel lots as soon as the list of addresses arrives from Ottawa—for the project is under the supervision of the Dominion Government. As is pretty generally known, Reward wheat matures about a week earlier than Marquis and, for this reason, is grown further north. This early ripening means, roughly, that a new strip of country 75 by 1,000 miles, is made available for wheat growing.
